Benefits and features

Functional packaging and protection

Protecting the goods in a clever way is required. Single serve, multi-packs, re-sealable, see-through.

Sustainability

Packaging production needs to reduce its environmental carbon footprint – less waste across the entire supply chain. New and thinner substrates. Recycling and re-use are the new rules.

Customization, versioning

personalization Packaging needs to reach all segments of the society taking almost any shape and size from very short runs to reprint and long runs. All with the best color consistency.

Faster time-to-market

A growing number of products need to reach consumers faster. Product lifetime is shorter. From product design to the consumer experience, the supply chain has to be more agile. Improving production quality

Packing

Allows adjustment of the box layer thickness to prevent damage to fragile cartons Perfect formation of box rows combine to the synchronization of the conveyor speed with the arrival of the box layer Batch collection of counted boxes when required

Ergonomics

Stress-free packing combine to a long working area and the slowing of the box layers on the collecting table Adjustable height collection conveyor for more convenience Less footprint
