Water Solublepaper

Water-soluble paper is a unique material that can be completely and quickly dissolved in water with printed matter or writing materials.

▲ Dissolves at any temperature

▲ It disperses 100% in water in 30 seconds or less

▲ Non-toxic, biodegradable and 100% recyclable

Our papers are used in a variety of industries including graphic arts, printing, food service, automotive assembly government, breweries, textiles and more. Versatility Suitable for many industrial, structural and functional uses.
